Applications**

Vembu Backup for Google Workspace

Backup for Google Workspace

Vembu Backup for Google Workspace is an effective solution that ensures protection of emails, contacts, calendar, and google drives by directly backing up to the on prem server. By adding your Google Workspace account with Vembu BDR Backup Server, you schedule automated daily backups for your Google Workspace data.

- Backup Entire Domain or Specific User Data
- Store Google Workspace backup data in your local data center
- Restore selected user mailbox or individual mails

The logo for Google Workspace, featuring the word "Google" in its multi-colored font followed by the word "Workspace" in a dark grey sans-serif font.

Vembu BDR Suite Deployment

On-premise Deployment - Simple

- Ideal setup for businesses looking to manage backups for their premises either it may be a large one or a small environment.
- Setup BDR Backup Server in your local environment and backup via LAN
- Configure and manage backup jobs from BDR Backup Server GUI
- Backup the SaaS application data to the storage repositories attached to the backup server.

Vembu BDR Suite

Key features

Key Backup Features for Google Workspace

Domain or User-level backup

Vembu allows you to configure agentless backups at domain-level or user-level for your Google Workspace account.

Agentless Backup

Vembu offers an agentless solution that simplifies the management and maintenance of your Google Workspace data.

Gmail Backup

Vembu offers a secure and robust incremental backup solution to protect your Google mailboxes along with its attachments from data loss.

Google Calendar Backup

Backup your Google account's calendar items such as events, meetings, schedules, and appointments to the locally attached storage repository.

Google Contacts Backup

Secure your Google contacts and its related items locally using Vembu Backup for Google Workspace.

Backup for G-Drive

Protect your Google Drive data like documents, folders - including photos, videos, etc... using Vembu.

Key Restore Features for Google Workspace Backup

One-Click Restore

With just a click you can restore your mails, contacts, drives, and calendars to the same user or different user account in Google Workspace.

Cross-user Restore

Admin users can restore backup data either to the original user account (from where the data was backed up) or to a different user account within the same domain.

Entire Mailbox/Folder-level Restore

Vembu Backup for Google Workspace allows users to restore entire mailboxes, or to recover only folders of the backed-up users.

Search and Retrieve Items

Vembu allows you to search the emails, attachments, and G-Drive files by providing keywords and restoring exactly what you need when you need it.

Multiple Export including .PST

With Vembu you can export the mail, contacts and mail items into .pst, .eml, .vcf, and .icf formats.

Restore with Folder Structure

Vembu preserves the entire folder hierarchy of your G-drive data while restoring those folders from the backup.

Other Key Features of Google Workspace Backup

Efficient Storage Management

Vembu BDR Backup Server utilizes VembuHIVE™ file system to effectively manage storage repositories..

Compression

Built-in compression and deduplication to reduce the storage space with the ability to scale as & when required.

End-to-End Encryption

The backup data is encrypted using the AES-256 bit algorithm to protect the data both in flight and at rest.

Disaster Recovery

Vembu protects your data by providing the option of replicating a copy of your Google Workspace data in any cloud object storage like AWS S3, Azure Blob, etc...

Email Notifications

Enable email notifications to get alerts on the actual status of the configured backups (like success, failure, missed).

Reporting

Users can manage all their backups with Backup Status Reports, Restore Reports, etc...
