Vembu Backup for Microsoft 365

Backup for **Microsoft 365**

Vembu Backup for Microsoft 365 performs agentless, incremental, daily backups for your Microsoft 365 Mails, Contacts, Calendars, OneDrive, Sharepoint online, and Teams by leveraging Microsoft's Graph API. By adding your Office 365 domain with Vembu Microsoft 365 backup, you schedule automated daily backups for your Office 365 data.

- Backup Entire Domain or Specific User Data
- Restore OneDrive Business Folders with Folder Structure
- Export to multiple formats like .PST, .EML, .VCF, .ICF, etc...

Vembu BDR Suite Deployment

On-premise Deployment - Simple

- Ideal setup for businesses looking to manage backups for their premises either it may be a large one or a small environment.
- Setup BDR Backup Server in your local environment and backup via LAN
- Configure and manage backup jobs from BDR Backup Server GUI
- Backup the SaaS application data to the storage repositories attached to the backup server

Vembu BDR Suite

Key features

Key Backup Features for Microsoft 365

Domain or User-level backup

Vembu allows you to configure agentless backups at domain-level or user-level for your office 365 account.

Exchange Online Backup

Protect your Exchange Online by backing up email accounts including inbox, sent items, other custom labels, and also the files with attachments.

SharePoint Online Backup

Backup for Microsoft 365 takes a copy of your SharePoint data, including Sites, Libraries and Folder/Items, etc., and stores them locally.

Microsoft OneDrive Backup

Backup Onedrive for business data like documents, folders – including photos, videos, etc

Group/Shared Mailbox Backup

Backup for Microsoft 365 takes a copy of your Shared/Group Mailboxes data, including Group conversation and Group Onedrive data, and stores them on-premise.

Microsoft Teams Backup

The critical files are backed up, and protected in Teams. With Vembu, you can also safely back up, manage, restore, and protect teams along with other Microsoft 365 essential items

Key Restore Features for Microsoft 365 Backup

One-Click Restore

With just a click you can restore your mails, contacts, drives, and calendars to the same user or different user account in Microsoft 365

Cross-user Restore

Admin users can restore backup data either to the original user account (from where the data was backed up) or to a different user account within the same domain.

Entire Mailbox/Folder-level Restore

Vembu Backup for Microsoft 365 allows users to restore entire mailboxes, or to recover only folders of the backed-up users.

Search and Retrieve Items

Vembu allows you to search the emails, attachments, and OneDrive files by providing keywords and restoring exactly what you need when you need it.

Multiple Export including .PST

With Vembu you can export the mail, contacts and mail items into .pst, .eml, .vcf, and .icf formats.

Restore with Folder Structure

Vembu preserves the entire folder hierarchy of your Microsoft 365 data while restoring those folders from the backup.

Other Key Features of Microsoft 365 Backup

Efficient Storage Management

Vembu BDR Backup Server utilizes VembuHIVE™ file system to effectively manage storage repositories..

Compression

Built-in compression and deduplication to reduce the storage space with the ability to scale as & when required.

End-to-End Encryption

The backup data is encrypted using the AES-256 bit algorithm to protect the data both in flight and at rest.

Disaster Recovery

Vembu protects your data by providing the option of replicating a copy of your Microsoft 365 data in any cloud object storage like AWS S3, Azure Blob, etc...

Email Notifications

Enable email notifications to get alerts on the actual status of the configured backups (like success, failure, missed).

Reporting

Users can manage all their backups with Backup Status Reports, Restore Reports, etc...

Vembu Backup for Microsoft 365
